

PreventionLink™

Online Training and Compliance Management Solutions

TargetSafety leads the industry in the development of online training and compliance management solutions. These solutions—designed specifically for firefighters and emergency medical technicians—are part of a powerful, web-based risk management platform known as PreventionLink.

Since 1999, more than 2,500 fire and EMS departments have relied on TargetSafety and PreventionLink to:

- **Dramatically reduce the expenses** associated with overtime, administrative tasks and fuel
- **Document and maintain records** on all required firefighter training and EMS continuing education hours
- **Facilitate better internal communication**, including during an emergency
- **Assign and deliver online NFPA and EMS continuing education courses** as well as OSHA and other compliance-related training

“TargetSafety has provided us an opportunity to promote EMS provider education in an innovative way. . . The program has allowed us to reduce training costs as well as provide validation of provider training.”

Joe M. Wilson, Chief
Assistant Superintendent
Detroit EMS

PreventionLink: The Benefits Add Up

Cost-Effectively Train Firefighters and EMTs

PreventionLink is the most convenient and cost-effective way to deliver training. With more than 170 refresher hours, the course catalog is available anytime and only requires a computer and Internet connection. The online training allows your employees to go at their own pace—dramatically increasing comprehension. In addition to PreventionLink courses, TargetSafety makes it possible to build your own multi-media training content using our Content Authoring Start-up Kit.

Simplify Recordkeeping and Ensure Compliance

Using PreventionLink, you can document vehicle and equipment inspections, record employee acknowledgment of your department's policies, monitor firefighter and EMT licenses and certifications, oversee ICS qualifications, and produce ISO reports. PreventionLink Event Manager allows you to create, track, and report on training and compliance activities such as instructor-led classroom sessions, webinars, organizational meetings, and more. In addition, PreventionLink's API makes it possible for you to more easily manage user records, as it can be synchronized with systems such as PeopleSoft, ZOLL (Sunpro, BIO-key), Firehouse and TeleStaff.

Create Custom Training and Tests

PreventionLink lets you deliver your department's own training content. It also makes it possible for you to build custom tests for each course.

Increase Communication within Your Department

PreventionLink Web Events, a comprehensive, web-based solution, allows you to cost-effectively communicate with remote employees via live, online meetings. You can schedule, host, record and report on web meetings all from within the platform. PreventionLink also provides a Forum for employee feedback.

Share Training and Compliance Resources

Using PreventionLink Community Resources, you have the ability to share information with hundreds of the most progressive departments nationwide, including training presentations, educational videos, SOPs and more.

Promote Health and Wellness

Using PreventionLink and Healthyroads®, you have a complete, web-based health and wellness program that addresses all five parts of the IAFF's Wellness Fitness Initiative.

Firefighter and EMS Training

As an NFPA member, TargetSafety offers firefighters an extensive course catalog, featuring:

- NFPA 1001 Series Firefighter I and II
- NFPA 1021 Series Company Officer
- NFPA 1500 Series
- Emergency Vehicle Operator
- First Responder Operations Level Refresher
- Emergency Response to Terrorism
- OSHA and Other Compliance-Related Training

We also provide EMS continuing education courses, covering such topics as:

- Preparatory
- Trauma
- Patient Assessment
- Medical
- Operations
- Airway
