

PreventionLink™

The PreventionLink platform provides the ability to view course content after completion of the course.

Users can re-visit the content of courses they have taken. Since the course content stays relevant over time, users can refresh themselves with the lessons and topics covered.

Users can easily find the topic of interest.

When a user completes a course their assignment history contains a listing of that course along with all others they have completed. Just by clicking on the course title, the user can review the course material at any time. When viewing the course again the bookmarking feature still remembers where the user left off, enabling easy access to information that is important to the user.
