FOR IMMEDIATE RELEASE

New PreventionLink Exposure Manager Helps Risk Pools Streamline the Renewal Process

Web-based Application is Fully Customizable, Saving Pools Time and Money

SAN DIEGO, Calif. — Aug. 11, 2010 — [TargetSafety](#), the U.S. leader in online enterprise risk management solutions for public entities, is streamlining the insurance renewal process for risk pools with the introduction of [PreventionLink Exposure Manager](#), a new application that automates exposure data collection.

News Highlights

- PreventionLink Exposure Manager is customized based on a risk pool's insurance coverage and data collection requirements, giving each risk pool a more efficient, cost-effective method for managing its renewal process.
- The solution automates the entire data collection process in a centralized, easy-to-use platform that increases data accuracy.
- PreventionLink Exposure Manager is an add-on to [PreventionLink Connect](#), TargetSafety's online communication platform designed exclusively for risk pools to increase member communication and collaboration through member management, loss control and community building tools.

About PreventionLink Exposure Manager

PreventionLink Exposure Manager includes everything a risk pool needs to initiate the renewal process:

- **Member Management:** With PreventionLink Exposure Manager, risk pools can maintain member contact information as well as control member access to policy data, modify lines of coverage by member and generate required schedules.
- **Renewal Process Management:** The solution removes the arduous task of manual data collection by ensuring data is collected in the format it is needed. A risk pool has complete control over changes made to the data and all information and forms are easily exported or printed.

- **Reporting:** PreventionLink Exposure Manager improves internal processes and communication by centralizing analysis and data reports. Risk pools can run summary reports on various data, including members, schedules and other important information; distribute renewal data; and create custom reports.

Quotes

Bruce Kaechele, President and CEO, TargetSafety: “Risk pools are faced with unique challenges because of their diverse membership. Orchestrating data collection, communication and analysis too often becomes enormously complex and time consuming, often straining risk pool resources. PreventionLink Exposure Manager puts new tools in the hands of risk pools, helping them focus on their core business.”
