

Streaming Video Hosting File Request Form

TargetSafety can host streaming video for internet delivery of video content. Just about any video content can be hosted that is not copyrighted or is used with permission from the copyright holder. Streaming video is designed to start playing as quickly as possible, rather than having to wait for the entire video to download. Results will vary based on computer configuration, connection speed, and quality.

Videos are sent to TargetSafety for conversion unless the client has the ability to produce properly formatted .FLV (flash streaming video) files. The best way to send videos is to burn them to a disk and mail them to TargetSafety. The .flv files will be uploaded to servers and links will be created in your File Center. TargetSafety can accept many different formats but the video content cannot have any DRM (digital rights management) otherwise we cannot convert it for use. A [media release form](#) must be on file for TargetSafety to begin video hosting. TargetSafety reserves the right to refuse to host any content that is a violation of the content policy.

We allow all Enterprise and Professional PreventionLink users' limited storage for free. There are additional charges for more space/transfer, if necessary. A breakdown of the pricing model is below:

- Free version: 50MB storage / 1.5GB transfer
- \$30/month Basic version: 250MB / 7.5GB transfer
- \$100/month Premium version: 1GB/30GB transfer

Conversion charge per clip: \$50 for the first minute and \$5 for each extra minute.
If files are in the proper .FLV (flash video) format then there should be no conversion charge.
TargetSafety can perform editing/cleanup of video files if needed but at an additional cost.

To submit a video for conversion, please fill out the form below:

Each video submitted will require its own form.

Please Note: The time to convert and upload a clip is 1 week.

Organization Name: _____

Contact Name: _____

Title of Video: _____

File Center Folder to add Video: _____

Do you want the Videos returned: _____

If yes, provide address: _____

Please return request form and Media Release Waiver (if there is not one currently on file) to TargetSafety either by fax (858.487.8762), email (support@targetsafety.com), or you may send it along with your video.

For Internal Use only:
