A Complete Online Training Solution

TargetSafety has a long-term commitment to providing affordable Internet-based training and training management tools to help organizations maintain compliance and reduce the risk of workplace injuries. Our web-based platform delivers safety awareness, human resource, company-specific and industry-specific training to employees 24 hours a day 7 days a week when and where it is needed. TargetSafety's training has been proven to reduce injuries, accidents, losses, and claims resulting in an excellent return on investment. The complete TargetSafety solution includes:

- **Online Training**
- **Resource Center**
- **Training Management**
- **Reporting & Record Keeping**
- **FleetSMART**
- **Other Tasks Other Training**

Easy-to-Use Platform

- Guaranteed to work on all platforms and all browsers that support cookies and javascript. Only an internet connection and a browser is required (no plug-in necessary)!
- NO EXPERIENCE NECESSARY! Everyone will find this easy and enjoyable.
- Take courses at your own pace; no need to wait around for slow courses or try to keep up with quick delivery.
- If for any reason you need to stop mid-course the system will automatically bookmark where you left off.

Engaging Course Content

- Each course is engaging with case studies, stories, and short interactions to reinforce key concepts.
- Each course uses graphics and pictures to illustrate the training concepts.
- Students must complete an exam in order to obtain a certificate of completion. Test questions are drawn randomly from a database of questions so no two tests are alike.
- Over 92% approval rating by employees!

Flexible and Customizable System

- A fully customized website for your organization with company name and logo. Each of your employees will have their own unique username and password.
- TargetSafety's online training courses are accessible 24/7/365. Courses can be taken at work during downtime, from home, or wherever an Internet connection is available.
- Organizational policies and procedures can be attached to each course.
- Industry- and site-specific training available.

Unparalleled Customer Service

TargetSafety provides each of our clients with the highest level of customer service possible. Our client services team can complete site development, installation and administrator training in 48 hours. No additional charge is assessed for ongoing customer support.

"I find exceptional value in all aspects of TargetSafety training...24/7 access, smart and secure navigating, valid training, convenient record keeping, and certified contact hours..."

TargetSafety Sexual Harassment - Introduction

Sexual Harassment

Sexual harassment is a serious problem in the workplace. Victims of sexual harassment can suffer physical and emotional damage while companies can suffer financially from the negative publicity and litigation costs as well as from the loss of job productivity and deteriorated work environment for its employees.

This course has been designed to help prevent incidents of sexual harassment in the workplace as well as provide guidelines on what to do if such an incident occurs. It aims to help employees recognize the seriousness of violations of sexual harassment policy.

After completing the course, you should have a good idea of what sexual harassment is, how it affects the workplace environment, what your role is in preventing it, and what to do if you are a victim.

Online Training

TargetSafety's library of online training courses includes general safety, occupational health, environmental awareness, human resource and supervisor training. Additionally, TargetSafety offers a complete library of Water Industry training and Fire & EMS training. All training courses can be customized through the uploading of organization specific policies and procedures.

Resource Center™

The Resource Center™ allows organizations to upload and post PowerPoint presentations, PDF files, links to web pages, and other resources you want your personnel to have access to. A great way to use this feature is to couple it with the "Other Tasks" feature and create a record for documentation purposes.

FleetSMART Intersection Safety - Lesson 9

Right-of-Way Rules

Intersection crashes are often a result of right-of-way violations. In fact, more injuries are due to right-of-way violations than any other improper driving behavior. Even safe drivers can become crash victims when other drivers do not follow the signs, signals, or right-of-way protocol at an intersection. Preventing crashes involves knowing when to yield the right of way and remaining alert for drivers who may not yield when they are supposed to.

Controlled Intersections

Intersections can be divided into two categories: uncontrolled and controlled. A controlled intersection is an intersection that has a traffic signal or control signage, such as a stop sign or yield sign.

Intersections like this one with a traffic signal are known as "controlled" intersections.

At controlled intersections, the traffic signal or signs determine who must yield the right of way.

FleetSMART™ Program

Features include a Manager's Guide to Implementing a Fleet Safety Program, policy and procedure templates, task templates to help manage and track key compliance requirements, and comprehensive driver training curriculum. The curriculum is tailored to meet the needs of driver of automobiles, large trucks, emergency vehicle, passenger vans and is designed to deliver two driving-specific courses per quarter in a two-year cycle.

Training Management System

The Safety Management System™ provides the administrator with the ability to assign training as well as track assigned, completed, and delinquent courses. With the SMS the administrator also has the ability to set training schedules and provide e-mail alerts to employees when training is assigned or is delinquent.

Other Tasks & Other Training

With TargetSafety's training management system you have the ability to track all training and tasks, including those completed outside of the TargetSafety system. Administrators have the option of creating custom task templates and using them to create a record of completion for documentation and reporting purposes.

Reporting & Record Keeping

Training reports can be quickly generated for all compliance tasks and training tracked in the SMS. Our reports include: scheduled training, delinquent tasks and/or training, rapid course completion, courses completed, and courses failed. We also have employee reports that can track the status of all active employees. Every report can be printed or exported into Microsoft Excel™ allowing for additional analysis and customization.

In addition, certificates of completion can be printed for all courses completed at any time. TargetSafety automatically stores all records for 20 years.

OSHA & Compliance Training

TargetSafety's online courses can be used to help comply with OSHA, DOT, EPA, and other federal and state regulatory agencies. Complete all of your required compliance training courses online, eliminating the logistics issues inherent in traditional training methods.

Occupational Health

- Infectious Disease Control
- Forklift Safety
- Trenching & Shoring
- Machine Guarding
- Hand & Power Tool Safety
- Incident Investigation
- Laboratory Safety
- Welding Safety
- General Construction Safety
- Personal Protective Equipment
- Respiratory Protection
- Risk Assessment Analysis
- Lock-Out / Tag-Out
- Indoor Air Quality
- Fall Protection
- Ladder & Scaffolding Safety
- Industrial Ergonomics

Environmental Awareness

- Asbestos Awareness
- Lead Awareness
- Hazard Communications
- Advanced HAZWOPER Awareness (8-Hour)
- HAZ-MAT Spill Prevention & Control
- HAZ-MAT Transportation
- Compressed Gas Safety
- Materials Handling, Storage, Use, & Disposal
- Radiation Safety
- Confined-Space Entry
- Laser Safety
- Combustible & Flammable Liquids

General Safety

- Back Injury Prevention
- Slips, Trips, & Falls Prevention
- Hearing Conservation
- Eye Safety
- CPR Academic
- General First Aid
- Electrical Safety
- General Office Ergonomics
- Office Safety
- Emergency Preparedness
- Working in Extreme Temperatures
- Fire Extinguisher Safety
- Fire Prevention Safety
- Driving Safety
- Evacuation and Emergencies

Human Resource Training

The human resource bundle has been designed to supplement our core course catalog and provide training that is relevant and essential to all employees.

- Workplace Violence
- Sexual Harassment
- Workplace Diversity
- Workplace Stress
- Health & Wellness
- Diet & Nutrition

Supervisor Training

The supervisor bundle has been designed to supplement our core course catalog and provide training that is relevant to supervisors in organizations of any size. This bundle includes:

- Reasonable Suspicion for Supervisors - Alcohol
- Reasonable Suspicion for Supervisors - Drugs
- Sexual Harassment Awareness for Supervisors (Meets the requirements of California AB 1825)
- CA Local Agency Ethics (Meets the requirements of California AB 1234)

Water & Wastewater Continuing Education

TargetSafety's water & wastewater continuing education courses have been designed to fulfill both the safety and technical recertification requirements for all levels of water industry professionals. TargetSafety's courses have been approved by many states for water and wastewater continuing education credits. Please contact TargetSafety regarding approval status in your state.

Online Training Course Catalog

NFPA 1500 Series

This series of courses is designed specifically for the fire industry and meets the NFPA 1500 code requirements. These courses were developed in conjunction with the NFPA and specific content experts at the NFPA participated in their creation.

- Hazard Communication
- Advanced Hazardous Waste Operations & Emergency
- HAZ-MAT Spill Prevention & Control
- HAZ-MAT Transportation
- Compressed Gas Safety
- Materials Handling, Storage, Use, & Disposal
- Confined-Space Entry
- Combustible & Flammable Liquids
- Personal Protective Equipment
- Respiratory Protection
- CPR Academic
- Driving Safety
- Bloodborne Pathogens Safety

NFPA 1001 Series / Firefighter I & II*

TargetSafety is developing a complete library of Firefighter I&II awareness and refresher level courses based on NFPA codes and standards. Look for more new courses in the months to come, such as:

- Driver Intersection Safety
- Driver Operator
- Firefighter Orientation and Safety
- Fire Behavior
- Ground Ladders
- Ventilation
- Introduction to Wildland Fires
- Forcible Entry
- Building Construction (*Coming Soon!*)
- Protection of Evidence of Fire Cause and Origin (*Coming Soon!*)
- Search and Rescue in a Structure (*Coming Soon!*)
- Vehicle Extrication (*Coming Soon!*)
- Water Supply (*Coming Soon!*)
- Fire Hose (*Coming Soon!*)

NFPA 1021 / Company Officer*

TargetSafety is developing a complete line of company officer awareness and refresher level courses based on NFPA codes and standards. Look for more new courses in the months to come, such as:

- Assuming the Role of a Company Officer
- Fire Investigation
- Fire Department Structure
- Legal Responsibilities and Liability (*Coming Soon!*)
- Leading Groups (*Coming Soon!*)

Emergency Response to Terrorism - Awareness Training

TargetSafety and the National Fire Protection Association are pleased to introduce Emergency Response to Terrorism - Awareness Training. This course was designed in conjunction with professionals from the NFPA, the fire service, and the US military.

Overview:

This introductory guide for first responders is essential for those who may be among the first to arrive at an incident of suspicious origin. It is intended to be a general introduction to the basic concepts for first responder awareness of a potential terrorist incident. This course consists of four individual training modules each requiring approximately 45 minutes to complete.

Module 1 - Terrorism in Perspective

This module is an introduction providing an overview of terrorism from the perspective of the first responder.

Module 2 - Incidents and Indicators

This module deals with recognizing suspicious incidents, key indicators, warning signs, and detection clues.

Module 3 - Self-Protection

This module deals with the types of potential harm and means of protection

Module 4 - Scene Control, Identification, and Coordination

This module focuses on the initial response to a potential incident including arrival considerations, scene isolation, evacuation, and procedures for activating response resources.

EMS Continuing Education

TargetSafety offers over 60 hours of state-approved online EMS continuing education courses. Our courses allow EMT Basic, Intermediate, Paramedic, ECA or First Responders to complete their continuing education requirements when and where they have time in an engaging easy-to-use format. (Please check with TargetSafety regarding approval status in your state).

Preparatory

- Health & Wellness
- Diet & Nutrition

- Respiratory System: Anatomy and Physiology
- Airway Management Basic
- Airway Management Advanced

Client Testimonials

Jerry Ledbetter
Alameda County Water District
Fremont, CA

In January of 2005, ACWD implemented TargetSafety's web-based training and training management system. One of the main reasons TargetSafety was chosen ahead of other web-based vendors was the industry specific courses provided by TargetSafety, specifically continuing education hours for their water treatment and distribution operators.

ACWD immediately realized two benefits with web-based training. The first was the ease of use for employees. Personnel could simply log into ACWD's website and proceed through a course at their own pace, ensuring full retention and understanding of the content presented. Second, web-based training provided one convenient location for all training, including safety, compliance, HR, and water treatment and distribution operator license contact hours.

By having all training in one location, ACWD could track and manage all training activities more efficiently and effectively, thus ensuring they maintain compliance with regulations and realize the high level of safety for which they strive.

During the first year of the program ACWD witnessed a reduction in lost workdays of 30.9% from the previous year and a 49.4% reduction compared to its ten year average.

Captain Nick Tison
Jacksonville Fire & Rescue
Jacksonville, FL

TargetSafety provides online courses that facilitate less staff hours of lecturing and provide more time for hands-on training. Online training also allows our department to easily complete EMS CEUs and meet more OSHA and NFPA standards and empowers training staff to create custom courses, further reducing personnel travel costs.

Perhaps the most valuable benefit of our program is the record-keeping system that tracks all employee training - automatically. We have also been impressed with the response from the TargetSafety client service team whenever an issue arises requiring our attention.

TargetSafety's unique position as the only web-based training firm partnered with the National Fire Protection Association makes them the only logical choice for a fire service organization. We are proud of the partnership the JFRD has formed with TargetSafety and look forward to a long and mutually rewarding relationship.

Customized Services

We pride ourselves in providing a flexible solution that meets the unique needs of our clients and are committed to delivering a product that works for you. As a result we offer a variety of custom services:

- A customized implementation plan to assist clients with employee communication and administrative training.
- A customized training website that includes the organization's logo. Employees appreciate and respond to the "company label" and look.
- Implementation of customized training matrix (s) so each employee receives the required EH&S and HR training course required.
- Integration of company policies with the related training courses to provide site specific employee training.
- Every course is scheduled, assigned, and tracked specifically for each employee.
- Additional safety, operational, or mission critical training provided to employees today can be web-enabled and provided with TargetSafety's courses.
- Other training and tasks can be tracked using TargetSafety management tools to provide a complete training picture.
- Company specific "Management View™" reporting can be designed and implemented.

We are constantly reviewing our course offerings to meet the changing needs of our clients. Please contact us about our custom course development services.

Free 30 Day Trial

- How will my employees respond to online training?
- Is the program really that easy to use?
- Can I get a demo of the system?
- Can I preview the courses?

Answer all of these questions by trying our services with a no risk no obligation free 30 day trial. Visit www.targetsafety.com to start for your free trial today.
