

BLS for Healthcare Providers Online Part 1

TargetSafety now provides first responders with access to the American Heart Association's Basic Life Support (BLS) for Healthcare Providers Online Part I curriculum through PreventionLink™. This integrated offering makes it possible to assign, track and report course completion—all from within TargetSafety's platform. In addition, the online format serves as a flexible alternative to classroom-style training—enabling first responders to take the didactic portion at a time and location that is most convenient for them.

The course content is delivered in three parts. Part 1 features the cognitive learning through web-based, self-paced modules. Parts 2 and 3 require students to meet with an American Heart Association Instructor to complete a hands-on skills practice session and a skills test. Upon successful completion of all three parts, students receive their BLS for Healthcare Providers Course Completion Card, which is good for first-time or renewal certification.

Features

- Series of online modules covering the required adult, child and infant CPR sequences
- 10 checkpoints to be completed
- 21 optional review sections and 17 videos
- Online test and evaluation

Benefits

- Self-paced learning, accessible anytime (24 hours a day)
- Flexible course design, accommodating a range of learning from basic checkpoint review to more extensive learning through optional sections
- Immediate answer feedback
- Content and format that reinforces understanding and ensures competence
- Efficient delivery, tracking and reporting through PreventionLink
